

Diagram Publishing in Deep Tactics

1. Right click on the board in Deep Tactics and select “Copy board to clipboard”

This copies the board as a bitmap-JPEG to the windows clipboard.

2. Open a word document or RTF file and then select paste (Ct-V) to paste the board to the document. You can size the board. This is an effective method for creating full color puzzle pages. After you copy the board/puzzle, you can click on the best line of analysis in the analysis tab to auto-draw the arrows for the best solution. This allows you to make puzzle books with the position on the front of the page and the answers on the back in arrows drawn as 1, 2, 3.
